

## MTV-CL

An extension of MTV technology, the MTV CL adds digressive characteristics for enhanced handling performance. This solution is appropriate for all LV segments.

Premium valve technology offers an optimal blend of comfort and handling.

Improved temperature stability

MTV CL 1616HD design provides more refined comfort characteristics (smooth blow-off point) and improved NVH performance.

1. Premium valve technology offers an optimal blend of comfort and handling.
2. Improved temperature stability.
3. MTV CL 1616HD design provides more refined comfort and improved NVH performance.
